EDITRADE® Launches a New Web Service for U.S. Customs' Import Clients

Miami, FL – For nearly two decades, Micro Software Services, Inc. (MSSI) has been providing software to simplify and expedite trade reporting to the United States Customs Service. With the launch of our newly re-designed web site, www.editrade.com, we are poised to become the leader in offering collaborative global data exchange, import clearance and trade services 24/7.

The *EDITRADE*® banner line of products supports multiple businesses in the logistics chain. Our expanding and scalable line of *EDITRADE*® software products connects companies across the globe to U.S. Customs computer systems and provides advanced means of electronically exchanging and managing trade data. Our active participation in ACE ensures that your future trade needs will be met.

Micro Software Services, Inc., was the first software developer to offer easy-to-use, cost-effective, PC-based software solutions to access U.S. Customs' Automated Broker Interface (ABI) and Air Automated Manifest System (AAMS).

Micro Software Services, Inc. is the leading import software developer in North America and is expanding its presence to become a Global Trade Connection resource.
